NEWALL

The DP700 is a powerful and intuitive DRO that is housed in a rugged, ergonomically designed casting. The DRO features all of the essential functions for milling, boring, turning and grinding.

Features can be customized and include:

- Bolt Hole Circle Routine
- Arc Contouring
- Polar Co-ordinate Readings
- Line Hole Routine
- Programmable Memory/Teach
- Tool Offsets
- Axis Summing
- Feed-Rate Display
- Linear and Segmented Error Compensation
- RS-232 Output

The DP700 is compatible with Newall's Spherosyn and Microsyn encoders which withstand the harshest shop conditions.
